## INNOVATION

Olivetti's new range of mid volume models consists of the d-Copia 3500MF PLUS, d-Copia 4500MF PLUS and d-Copia 5500MF PLUS. They implement latest-generation technology and solutions for **easy, productive, secure and eco-sustainable use**.

Products for today's markets must be fast, reliable and secure, and respect the environment. Designed to satisfy and out-perform these requirements, the d-Copia 3500MF PLUS, d-Copia 4500MF PLUS and d-Copia 5500MF PLUS are the new benchmarks in their category.

Key innovations include a **sharp reduction in power consumption**, and a particularly fast first-copy out time. The entire range features a **standard 2 GB RAM**, so no additional expansions are needed to control all the machine functions and options.

The new 8.5" colour touch panel provides an **original and more intuitive user interface**, with navigation similar to a smartphone.

*New user interface for the colour touch panel*

*High scanning speed and optional OCR support for production of PDF searchable files*

## DATA SECURITY

Data protection is of fundamental importance for many office activities. The new d-Copia 3500MF PLUS, d-Copia 4500MF PLUS and d-Copia 5500MF PLUS introduce new solutions to raise security and data confidentiality, both at a local level and for network operations.

The models are compatible with the **IEEE P2600 standard** for security levels on office equipment. Cancellation of hard disk data by overwriting in compliance with the **ISO/IEC 15408 standard** is also extended to the special fax transceiver memory with the optional Data Security Kit (E). Data forwarding in network environments is protected by state-of-the-art transmission protocols such as **SSL, IPsec/IKEv.2**. Various levels of protection are available when printing confidential documents.

Recognition of USB memory sticks can be prohibited to prevent unauthorised data transfers from the MFP.

## REDUCED MAINTENANCE

Advances in amorphous silicon technology have enabled development of **print drums with a very long operating life** and a sharp reduction in maintenance services. The new models produce **600,000 printouts from one service to the next**, a market benchmark for this class of product.

Reduced maintenance is a significant factor in **containing running costs** and, consequently, in delivering one of the most competitive per-copy costs on the market.

## GREAT FLEXIBILITY

The d-Copia 3500MF PLUS, d-Copia 4500MF PLUS and d-Copia 5500MF PLUS offer one of the **most complete ranges of options on the market today**.

The result is high configuration flexibility, allowing you to “build” the product to suit your specific requirements. **Paper capacity can be increased to 7,150 sheets**, with paper weights ranging from 60 to 220 g/m<sup>2</sup> via the paper cassettes (60 to 300g/m<sup>2</sup> from the by-pass). A choice of two document feeders is available.

The **DP-770 (RADF)** has a stack capacity of 100 sheets and can scan up to 75 ipm. The **DP-772 is a Dual-Scan Feeder** which scans both sides of a document simultaneously has a stack capacity of 175 sheets and scans up to 160 ipm.

With the **new optional Scan Extension kit equipped with optical character recognition software**, files can be created in searchable PDF format with separation of images and text, enabling text to be edited and/or copied to other documents.

**Two finishers** are available, with a capacity of 1,000 or 4,000 sheets, and 50 or 65 sheet-stapling both of which can be equipped with a 2 or 4 hole punch. The larger finisher can also be fitted with a multi-tray sorter (7 trays), as well as a folder unit for booklets and 6-side leaflets (Tri-fold for A4 sheets).

The list of options also includes a fax board (2 fax boards can be installed for 2 telephone lines), a Data Security kit, for data deletion and overwriting on the hard disk, fax memory, RFID proximity readers, for automatic user authentication, and access to the system functions.

**SIMPLIFIED OPERATION**

**PAPER CAPACITY UP TO 7,150 SHEETS (OPT)**

**1,000 / 4,000 SHEET FINISHERS (OPT)**
