KEY FEATURES

- 1 Intuitive usage via a large colour touch panel gives easy access to the print, scan, copy and fax functions.
- 2 Excellent image quality with exceptional clarity and sharpness will deliver impressive colour documents.
- 3 Based on reliable Toshiba e-BRIDGE technology the e-STUDIO407cs series seamlessly integrates into existing print fleets and allows easy yet effective administration.
- 4 Thanks to the Toshiba Secure Hard Disk Drive with self-erasing technology and sophisticated authentication method, these systems offer an outstanding level of data security.
- 5 A paper capacity of up to 3,160 pages ensures that large print jobs are processed without interruption.

Compact design, easy integration, excellent colour and monochrome image quality – the e-STUDIO407cs series gives you a choice of three models for multifunctional A4 document production at speeds ranging from 28 to 40 pages per minute. Thanks to e-BRIDGE technology, these A4 specialists fit seamlessly into existing fleets.

Designed with the environment in mind

With many companies seeking to reduce their ecological footprints, Toshiba has placed sustainability and climate protection high on the agenda in developing the e-STUDIO407cs series. The three models are designed to operate at low energy and save resources. They offer duplex printing to save paper as well as auto energy save modes. The series complies fully with the ENERGY STAR® emissions standard.

A STYLISH ALL-ROUNDER

The right device in the right place

With the large numbers of documents processed in most offices, a compact device specialised in A4 can significantly enhance convenience and productivity. To ensure maximum efficiency wherever large volumes of A4 documents are required, Toshiba has designed three multifunctional systems which are fully equipped with e-BRIDGE technology for smooth and easy integration into existing fleets. This gives offices easy access to A4 documents at all times.

In size, shape and performance, the e-STUDIO407cs series fits perfectly into the modern office. Compact as they are, the three models of this series are loaded with performance – like an effective speed of 28, 34 and 40 pages per minute (ppm) respectfully, useful finishing options and intuitive operation via the large touchscreen.

By adding up to five additional paper sources such as cassettes or a large capacity feeder, the devices can offer a total paper capacity of as many as 3,160 sheets. This enables different users or departments to print on separate colours or letterheads, without constantly having to change paper. Therefore, these three models are ideal for departments and workgroups requiring reliable productivity.

Crystal clear down to the smallest detail

Whether images or text, colour or monochrome, the e-STUDIO407cs series deliver A4 prints, scans and copies in the exceptional clarity and sharpness you'd expect from a Toshiba system. Fine lines and tiny dots come out crystal clear, with a wide range of colour nuances and excellent gloss finish.

A sound investment in adaptability

This A4 series is designed for image quality, performance and versatility in three models that all deliver the same outstanding value for money, but offer a choice of different print speeds. Each unit provides all-in-one functions – print, scan, copy, optional fax – and can be individually configured and expanded to fit evolving needs.

The Universal Printer Driver is a user-friendly feature which allows the storing of personal settings via one-touch templates. Furthermore, activating department- and/or user-codes enables easy handling of access rights to the various functions.

Integrated Solutions

The Toshiba e-BRIDGE Open Platform opens up a world of embedded solutions. Integration with output management, mobile printing solutions, document capture and document workflow management enhances business efficiencies and reduces costs. The optional Toshiba e-BRIDGE Re-Rite enables users to convert hard copy documents in to text searchable PDF's, and Microsoft Office formats at the touch of a button. The intelligent e-BRIDGE controller and large 9-inch colour touch panel ensures that the user operation is convenient and intuitive.
